

INVESTMENT FUNDS

The Foundation offers a choice of 4 different investment funds.

In keeping with the investment guidelines of the United Methodist Church, the Investment Committee of the Foundation seeks to be socially responsible in the way in which it invests the funds it oversees, reflecting the ethical standards of the Church. The United Methodist Church's Book of Discipline provides a guideline that seeks avoidance of investments that appear likely "to support racial discrimination, violation of human rights, sweatshop or forced labor, gambling, or the production of nuclear armament, alcoholic beverages or tobacco, or companies dealing in pornography." It is the policy of the Foundation to seek to avoid direct investments in such companies.

BALANCED FUND OBJECTIVE

The overall goal of the Balanced Fund is to provide both income and growth of capital while avoiding excessive risk and volatility. The Balanced Fund's portfolio has an asset allocation mix that consists of equities, fixed income and cash. The fund is attempting to mitigate the wide fluctuations sometimes experienced in the overall stock market through diversification among different asset classes.

As of 12/2013	1 Yr	3 Yr *	5 Yr*	7 Yr*
BALANCED FUND	16.58	10.67	12.46	4.73

BOND FUND OBJECTIVE

The goal of the Bond Fund is to provide income, liquidity and a total return that exceeds that of core inflation. The Bond Fund's portfolio has an asset allocation mix that consists of intermediate and short term maturity bonds and cash. While some volatility still remains within a bond portfolio, it is normally less than that experienced in a stock portfolio. The fund provides this lower volatility by bond type diversification and the short intermediate maturity nature of this fund.

As of 12/2013	1 Yr	3 Yr *	5 Yr*	7 Yr*
BOND FUND	-4.27	2.82	4.42	4.60

STOCK FUND OBJECTIVE

The overall goal of the Stock Fund is to provide growth of capital primarily through appreciation. The Stock Fund's portfolio has an asset allocation mix that consists of equities and cash. This fund is attempting to mitigate some of the wide fluctuations experienced at times in the overall stock market through diversification among different equity sizes and styles. As with any investment that is focused on excess return, higher volatility can be experienced as well.

As of 12/2013	1 Yr	3 Yr *	5 Yr*	7 Yr*
STOCK FUND	26.16	14.32	16.99	5.15

MONEY MARKET FUND OBJECTIVE

The goal of the Money Market Fund is to provide 100% liquidity. The fund's purpose is to provide investors with a safe place to invest easily accessible, cash-equivalent assets. It is a type of mutual fund characterized as a low-risk, low-return investment. The fund's portfolio is comprised of short-term (less than one year) securities representing high-quality, liquid debt and monetary instruments.

As of 12/2013	1 Yr	3 Yr *	5 Yr*	7 Yr*
MONEY MKT FUND**	0.14	0.12	0.98	2.00

*Annualized 3, 5 & 7 Yr returns reflect hypothetical portfolio returns. All returns are net of Investment Fees but not Foundation Fees.

** Money Market Fund Returns for 3, 5 and 7 yrs are based on 3 month US treasury bill returns and are not the actual return of the Fund.

Merrill Lynch Wealth Management provides a broad range of brokerage, investment advisory (including financial planning), banking, trust, mortgage and other financial services and products offered by Merrill Lynch. The nature and degree of advice and assistance provided, the fees charged, and client rights and Merrill Lynch's obligations will differ among these services. Any information presented about tax considerations affecting client financial transactions or arrangements is not intended as tax advice and should not be relied on to avoid any federal, state or local tax penalties. Neither Merrill Lynch nor its Financial Advisors provide tax, accounting or legal advice. Clients should review any planned financial transactions or arrangements that may have tax, accounting or legal implications with their personal professional advisors. General Risk This material is provided for discussion purposes only and does not constitute an offer to purchase any security or investment. An offer of interests in any particular investment can only be made pursuant to the prospectus or disclosure document for such investment, which contains important information concerning risk factors, performance and other material aspects of the investment and must be carefully read before any decision to invest is made. The investments discussed have varying degrees of risk. Some of the risks involved with equities include the possibility that the value of the stocks may fluctuate in response to events specific to the companies or markets, as well as economic, political or social events in the U.S. or abroad. Bonds are subject to interest rate, inflation and credit risks. Investments in foreign securities involve special risks, including foreign currency risk and the possibility of substantial volatility due to adverse political, economic or other developments. These risks are magnified for investments made in emerging markets. Structured investments may not be suitable for all investors. Asset allocation and diversification do not assure a profit or protect against a loss in declining markets. Borrowing against securities may not be appropriate for everyone and should be carefully evaluated before being used. If securities decline in value, the account holder may be required to pay down the loan or deposit additional securities as collateral. If they cannot do so, all or a portion of their collateral may be liquidated and the proceeds used to pay down the loan balance. A forced liquidation could also have adverse tax consequences or trigger potential capital gains taxes.
